Lê Tuấn Nam

Smart Contract Developer

0889318383
tuannamle256@gmail.com
Hà Nội

OBJECTIVE

I aim to grow as a blockchain developer by gaining hands-on experience in smart contract development. In 5 years, I strive to become a skilled engineer contributing to impactful decentralized solutions, driving real-world blockchain adoption.

WORK EXPERIENCE

Antora Technology

6/2025 - Now

SMART CONTRACT DEVELOPER

Develop, upgrade and deploy smart contract.

TovChain

6/2024 - 3/2025

SMART CONTRACT DEVLOPER

Proficient in designing smart contracts with Solidity and performing thorough testing using JavaScript and TypeScript.

Cystack

8/2023 - 3/2024

CYBER SECURITY INTERN

Familiar with MFC application development, reverse engineering, and cryptography.

EDUCATION

2022 - 2026

CYBER SECURITY

Hanoi University of Science anf Technology

2025 - Now

Self Research Distributed System, core Ethereum, EVM

https://my-website-mu-steel.vercel.app

2025 - Now

Competitive Programming

https://www.facebook.com/topalgo.thuat.toan

Join a course for learning competitive programming to improve DSA skills.

SKILLS

Core Competencies

Team leadership,, research-driven development

Blockchain & Smart Contract

Advanced Solidity, intermidiate Yul, Hardhat, Foundry.

Backend & Tooling

Node.js, Express.js, Ethers.js, Web3.js

Other language programming

Golang, C++, Cairo

HONORS & AWARDS

2024

First prize OnChain Name & Identity Hackathon VietNam.

2025

Third prize Starknet BaseCamp Hackathons.

PROJECTS

Decentralized secure email system

4/2024 - 6/2024

MEMBER

OnChain Name & Identity Hackathon VietNam 2024: Team size: 4
Project link:
https://github.com/nairyuuu/modoboa-installer
An installer for Modoboa for HNS Domain Secure email system using Handshake blockchain to help people to create own email server and client by using domain name on Handshake node and using hnsd (Handshake SPV name resolver) to resolve domain name and use end to end encryption for encrypting messages between others.

Trava

10/2024 - 12/2024

MEMBER

Company: Tovchain
Techstack: Solidity, Javascripts, Typescripts
Project link:
https://github.com/PhanNam1501/nam-trava-station-simulate
https://github.com/PhanNam1501/nam-trava-station-core

Build a DeFi application that enables users to perform multiple actions such as withdrawing funds, swapping tokens, and making deposits within a single transaction. The system integrates multiple DEXs into the dApp, allowing users to execute trades seamlessly across different decentralized exchanges.
Build a simulation dex Camelot v3 like Uniswap V3 but using fee mechanism by sigmoid function by Typescripts to help users know exactly how many liquidity they can receive.

TCV Balance

1/2025 - 3/2025

MEMBER

Company: Tovchain
Techstack: Solidity, Javascripts, Typescripts
Build a vault that helps users handle situations where their trade prices fall outside the tick range on Camelot V3. I designed a custom logic that follows a withdraw–swap–mint sequence to optimize rebalance costs and improve efficiency for users.

Freelance

4/2025 - 5/2025

MEMBER

EncryptSim Mobile app:
Techstack: Javascripts, Express.js, Firebase (Firestore, Authentication), Solana Web3.js, and RESTful APIs
Project link: https://github.com/encryptSIM
Build the backend system that allows users to pay for Airalo eSIM services (https://www.airalo.com/) using SOL to fetch and integrate API data from the Airalo eSIM platform, enabling real-time interaction between the application and the SIM service provider.

CasiVault

2/2026 - 3/2026

Lead team

Starknet Basecamp 2025:
Team size: 5: Tech stack: Cairo, Solidity, Typescrips, Javascripts
PROJECT LINK: https://github.com/CasiVault
A DeFi project where users can stake tokens into smart vaults operated by AI agents, optimizing yields through lending or staking strategies.
Additionally, CasiVault introduces a chess mini-game that allows players to organize tournaments with fully on-chain rewards.

Bean-Exchange

7/2025 - 11/2025

Smart Contract Developer

PROJECT LINK:
https://spotbeta.bean.exchange/pools/dlmm/0xa2e3a2e74bdfe64f172b9a68860eba36d8720749
Techstack: Solidity
First DLMM Dex on Monad Mainnet

First DLMM Dex on Monad Mainnet

Bean Exchange

11/2025 - 2/2026

Smart Contract Developer

PROJECT LINK: Private
First DAMM v3 likes Meteora Dex on Monad Mainnet
